Louisville Water

# Classroom Visits

Louisville Water offers free classroom visits to teachers and other educators. Water is used as the teaching tool to cover several content areas. Lessons align with school standards and are a real-world extension of classroom learning.

## Science

- Properties of Water
- States of Matter
- Earth Materials
- Erosion and Weathering
- Filtration
- The Ohio River
- The Water Cycle
- Force and Motion

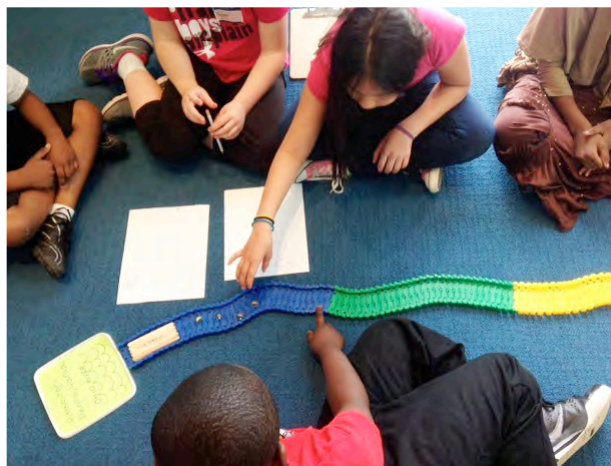

## Social Studies

- Global Water
- Community Uses
- History of a Water Utility
- The Ohio River
- Why a Water Company?

## Practical Living

- Clean Hands Up!  
Proper hand washing and germ prevention
- Hydration
- Health Benefits of Water
- Where's the Sugar?

## And Many More!

We'll work with you to find a program that fits your needs.

# Take A Field Trip

Visit Louisville Water Tower Park, home of the WaterWorks Museum. This field trip combines cross-content learning at the site of our National Historic Landmark.

Included in the visit is time in the museum, a guided tour and an on-site lesson. Students will learn the stories behind every glass of drinking water!
