Re: Backflow Prevention Device Annual Test – **Second Notice**

Louisville Water’s Cross-connection Control Program requires that the backflow prevention devices are tested annually to ensure they work properly and will protect the water quality in the public distribution system. Per our records, the **backflow prevention device listed below is past due for required annual testing:**

Account #: [Redacted]
Meter #: [Redacted]

Device information:

Device: [Redacted]
Location: [Redacted]

Serial Number: [Redacted]

**** If you are a commercial or industrial customer,** please contact your plumbing contractor.

**** If you are a residential customer with an irrigation system,** this letter pertains to the backflow prevention device installed on your irrigation system. Please contact your irrigation contractor to let them know you have received this letter.

Your contractor must perform a backflow test and submit test report results within 14 days from receipt of this notice to one of the following (if the test has already been performed, please ensure your contractor has submitted results):

Mail: Louisville Water Company
550 South 3rd St.
Louisville, KY 40202
Attn: Cross-connection Control Program

Email: crossconnection@lwcky.com
Fax: 502-569-0848

The customer is responsible for all costs associated with the test/repair. If you have any questions please visit our website at <http://www.louisvillewater.com/CCP>

Sincerely,

Cross-connection Control Program
crossconnectionhelp@lwcky.com
